SERVICES

OUR PRODUCTS

IT FACILITY MANAGEMENT SERVICES (FMS)

At Oriflamme IT Solutions we work with different segments of customers ranging from multi-national corporate to SMEs. Thus we understand and offer valued services that address the specific requirements of the customer, by providing expert cost-effective services to enhance as set value and maximize returns.

Oriflamme IT Solutions IT FMS - all along we have been in the business of providing high quality Facility Management Services, which is of course manpower based support model. Our expert panel members, provide well training professional and skilled resources for catering to the exact requirements ranging from on-site support models to providing specialized remote management support, in an efficient manner with scope of managing and maintaining the entire IT infrastructure.

Annual Maintenance Contract (AMC)

AMC Stands for Annual Maintenance Contracts, it is also known as Annual Maintenance Charges. Every computer owner gets this service when he bought his computer and after that, the company will be responsible for the up keeping and all-round maintenance of the computer. Generally, this type of contracts is signed for one year at a time and It can be extended up to two or more years as per the agreement between the parties. In AMC, the company usually provides service support to the customer and charges for the faulty parts of the machine.

Maintenance of computer devices is very important as our most of the work is depends on the system. Once the problems are identified, the Oriflamme IT Solutions Computer experts thrive in at their best to resolve those issues with their proficiency and excellence. So, we provide Computer AMC services in Mumbai to keep your system and devices up to date and provide you with better and newer technologies. If you facing any problem in Your Computer No matter problem is related to software or Hardware or related to networking, our certified and Expert Computer AMC provider are here to provide you the best solutions.

We mainly offer two types of Computer AMC Services

- **Non-Comprehensive AMC Services**

Non-comprehensive AMC service includes repair & services only. The cost of defective parts to be paid by the customer.

- **Comprehensive AMC Services**

Comprehensive AMC service includes all parts. There are no charges for any part replacement with repair and services

Our Laptop/Computer AMC services in Mumbai covers

- Unlimited door step visits.
- Speed up a slow computer.
- Free Critical Software Updates.

With our expertise and experience. We provides our customers with the commitment that the telecommunications infrastructure, no matter how complex, will be designed, constructed and installed to meet current and future requirements.

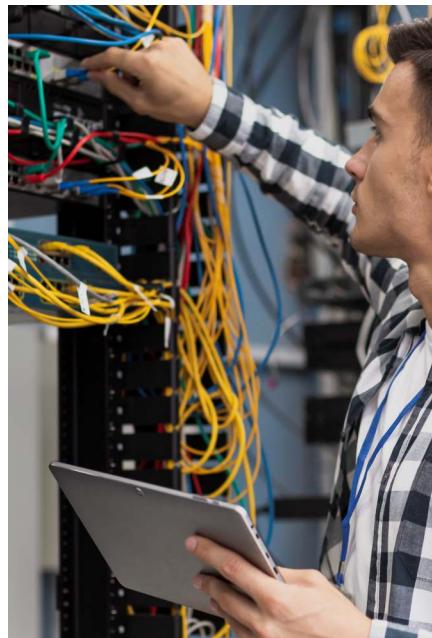

Network Design and Consulting

Structured cabling system design

Installation of CAT -6/copper/fibre Optics cable laying

Installation of Racks, Patch Panel, Switches I/O

Installation of Numbering, Testing, Punching Cable critical on and compliance testing

FIREWALL / NETWORK SECURITY SOLUTIONS

Network Security has to evolve with the changing data security threats of today. Oriflamme designs security solutions with the latest technologies to keep your organization safe from malicious activity. More than ever before, network security must become application aware in order to mitigate application threats. Oriflamme can build solutions to give companies complete control over applications, users and content. Combined with Role Based Access Control, our solutions will reduce the risks to any organization.

Our solutions include:

ENTERPRISE SERVER SOLUTIONS

- **SERVER & STORAGE SOLUTIONS**

Oriflamme offers a full range of Enterprise Server & Virtualized Storage (ESVS) solutions for your organization, from industry-leading companies including Dell, HP, Lenovo and IBM. The suite of products include x86 & RISC-based Server/Nearline& Online Storage /High Availability of Application/Server Consolidation/Virtualization & Backup Solution.

- **INDUSTRY STANDARD SERVER**

ISS technology communications either explain strategy, development, and implementation of key technologies in industry-standard systems or the way to integrate operating systems and applications software with ISS systems to achieve maximum benefit.

- **BLADE SERVER**

Blade Systems enclosures have inherent benefits. We have combined the best technologies to make Blade Systems not only easy to use, but also useful. The same powerful innovations are available to you regardless of the choice of blade enclosure.

CCTV SURVEILLANCE & ATTENDANCE MANAGEMENT SYSTEM

CCTV ANALOG

Though most of our attention these days is focused on the transition to IP video technology, it's important to note that analog CCTV solutions can still be highly effective for many surveillance applications, especially those on a budget. With traditional CCTV, the video signal is processed and transmitted in analog format for local viewing from one central monitoring location.

CCTV IP

IP video technology provides flexible, scalable, and cost-effective surveillance solutions suitable for a wide range of industries and applications. With an IP-based video surveillance setup, users can monitor and record video remotely using an IP network as the system's backbone. IP video installations can be deployed in any environment, and offer many benefits previously unavailable with analog CCTV systems.

ACCESS CONTROL AND ATTENDANCE MANAGEMENT SYSTEM

Access control is any mechanism or system that manages access through the authorization or revocation of rights to physical or logical assets within an organization. Provide a safe environment for employees, visitors and contractors.

Solutions designed to protect your facilities requiring higher security, sensitive data, networks and critical or high value assets.

TYPES OF VIRTUALIZATION

Oriflamme will help make Virtualization as easy as possible to understand, design and deploy. You can be confident that you are working with an experienced and trusted solution delivery partner that will help you assess your current environment and develop a Virtualization strategy that will work for both you and your business.

• SERVER VIRTUALIZATION

The computing power of servers has reached epic levels and it is estimated that up to 95% of server computing power is not utilized. By creating virtual servers from a single machine, resources are shared, expenses reduced, and IT users' needs are met more efficiently.

• APPLICATION VIRTUALIZATION

Oriflamme application virtualization solution helps your employees to handle large and fluctuating work volume, and also helps to optimal utilization of existing hardware.

• DESKTOP VIRTUALIZATION

With a virtualized desktop environment, maintenance and upgrade cycles are greatly simplified and users can access their desktop from anywhere in the world. Platform independence can finally be achieved while reducing the costs of shipping expensive hardware to remote users.

• STORAGE VIRTUALIZATION

Optimize use of disk space as the volume of your data increases with a virtualized storage solution. Our team of experienced virtualization consultants and engineers will design a storage virtualization solution that simplifies management and administration of the storage environment.

• NETWORK VIRTUALIZATION

With a virtualized network, you can ensure that available resources are being utilized as efficiently as possible while leveraging the right technology for peak performance. Our engineering team will improve overall performance of the network and reduce network management costs by consolidating multiple physical networks into one, virtual network.

STORAGE SOLUTIONS

Storage solution is critical to the success of any company, where you're looking to reduce the cost through storage consolidation, capacity utilization, and content management & distribution. Oriflamme can help, with our expertise in SAN, NAS, DAS and networking environment, and our technology alliances with storage market leaders.

- Tape, Disk-based Backup
- Storage Area Networks (SAN)
- Network Attached Storage (NAS)
- Direct Attached Storage (DAS)
- Tape Library's
- Disaster Recovery Solution Ø Backup and Archiving Solution

DATA BACKUP SOLUTIONS

Doing any kind of business comes with inherent risks. But one risk which we know you should never need to face is the risk of losing your critical business data. Our company is able to offer remote Cloud backup solutions for desktop and laptop computers which are reliable, comprehensive, and affordable. Some of our cloud backup services include:

- Mailbox level backups
- Exchange server level backups
- File data backups
- Database backups
- Disaster recovery

We also offer our clients remote offsite backup services in the cloud, meaning that your most important digital assets are always accessible and optimally secured. Find out more about how our team at Oriflamme can help you with your backup solutions by contacting us

POWER BACKUP SOLUTIONS

Quality Power Solutions provides comprehensive uninterruptible power supply maintenance programs for both the small network-ready UPS to the large multi-module systems. Whatever the needs of your power backup system, our routine maintenance service provides around-the-clock peace of mind. Full-service UPS maintenance includes both emergency service and preventative maintenance. Our technicians are on hand 24x7 for any emergency service. We schedule regular preventative maintenance inspections on the UPS and batteries during the contract period. These types of regular inspections are vital to ensuring your power backup system works when you need it most.

CLOUD COMPUTING SERVICES

Is your business ready for the cloud? Our extensive experience migration organizations to the cloud will ensure you take advantage of the right cloud-based platforms. Whether it be your servers, or exploring Software as a Service options; we will maximize your private or public cloud investment

IT CONSULTING

Are you using the right technology for your business? Our team of Senior Consultants drives industry best practices to help you maximize the use of technology within your business. We identify weaknesses, present you with opportunities for improvement, and implement cutting-edge technology solutions.

IT INFRASTRUCTURE

It takes a certain skillset to manage, maintain, and optimize a physical, virtual, or cloud server environment and enterprise network infrastructures. Whether it be your physical/virtual servers, your storage, or your network, we have the experience to help with your IT infrastructure needs.

Servers, Networks, Storage? We got you covered!

End Point Security & Data Storage Backup

Are you protected from all angles?

The Oriflamme Managed Security solution ensures your desktops, laptops, servers, and most importantly, your business data, is protected. Our Managed Security solution utilizes a multi-layer approach to securing your network which protects you from malicious threats and data theft.

It's time to take security seriously!

CCTV SURVEILLANCE

CCTV Camera Security Systems are quickly becoming an important aspect in Human Life.

CCTV ANALOG

Though most of our attention these days is focused on the transition to IP video technology, it's important to note that analog CCTV solutions can still be highly effective for many surveillance applications, especially those on a budget. With traditional CCTV, the video signal is processed and transmitted in analog format for local viewing from one central monitoring location. But that doesn't mean you can't use analog cameras in an IP-based surveillance environment.

Using IP video encoders and other equipment such as digital video recorders and hybrid DVRs makes it possible to leverage your existing analog cameras while migrating into the world of digital surveillance.

CCTV IP

IP video technology provides flexible, scalable, and cost-effective surveillance solutions suitable for a wide range of industries and applications. With an IP-based video surveillance setup, users can monitor and record video remotely using an IP network as the system's backbone. IP video installations can be deployed in any environment, and offer many benefits previously unavailable with analog CCTV systems.

ACCESS CONTROL AND TIME ATTENDANCE SYSTEM

Access control is any mechanism or system that manages access through the authorization or revocation of rights to physical or logical assets within an organization.

Provide a safe environment for employees, visitors and contractors. Identify who is in my building.

Know who is in your facility, manage their level of access and meet regulatory compliance objectives.

CONTROL ACCESS TO HIGHLY SECURE AREAS.

Solutions designed to protect your facilities requiring higher security, sensitive data, networks and critical or high value assets.

EMPLOYEE TIME AND ATTENDANCE

- Track employee productivity
- Simplify absence management
- Streamline employee attendance
- Synchronize with any attendance device

ACCESS CONTROL

E-Time Trace Lite is a comprehensive Web/Windows based software application to maintain the daily attendance or movement of the Employees in an Organization during the working hours. The system can be operated manually or integrated to the electronic device such as Biometric or Proximity card or Magnetic car reader so that the Attendance module downloads the data and process to deliver the desired reports.

SOME OF THE FEATURE ARE OF THE SOFTWARE ARE

- Holiday management
- Simplify absence management
- Leave and Special permission
- Manual Attendance amendment

WEB SOLUTIONS

We create inspiring solutions for the Web. With unmatched creative and technical know-how, we go one stride ahead to achieve excellence. We offer all web technologies under one roof ranging from Java, PHP, Net, ROR, and Perl making us one-stop-shop for all your web needs. We have extensive experience utilizing global best practices for the design, development and deployment of web applications. Whether you use conventional web publishing tools and workflows or have the latest web content management system, our work ensures we produce in a cost-effective and time-efficient manner.

Our web solution experts provide design and content management for websites. The vast range of web solutions includes E-commerce sites, Portals, Content management systems, Social networking communities, Chat applications, Multi-lingual support, API integration, E-mail integration, Online retail/auction stores, Integration with payment gateway, CRMs, ERP integrations, and many more.
